BISON BORD®

Our premium quality, interior-grade BisonBord® serves a wide variety of purposes across homes, offices and retail spaces.

BisonBord is available as E1 (Class 1) or E2 (Class 2)*.

Particleboard (also known as chipboard) manufacturing was once a simple way to use wood waste. Today it's a highly sophisticated technology that uses careful selection of raw materials, detailed wood particle preparation and a scientific application of additives and binders. The result is a uniform, high-quality board that is extremely versatile and affordable.
